**Plan of Numbering.** Streets running north and south begin numbering at Jackson street with 100 on east and 101 on west side of street, and streets running east and west begin numbering at Crawford street with 100 on north and 101 on south side of street, allowing one number for each half of full residence lot and beginning each block from base lines with the hundred greater than the one south or east, i. e.; the fourth block from either Jackson or Crawford streets would begin with 400 and 401, etc. Business lots of 25-foot frontage are given one number and of 50-foot frontage two numbers, but each separate building is given a number in case the frontage is less than above.

E Boone, E Lincoln and E Hanover mean buildings on those streets east of Kingsbury and High streets. S Lincoln means the Lincoln street running east and west between Duff and eastern city limits and lies between Boone and Hanover streets. N Lincoln means the Lincoln street running north and south from College to Sycamore streets, between Clark and Hoggatt streets.

The two blocks from East and High to Duff are numbered as one block, beginning with 200-201. Absence of a number of the building after any name indicates that the owner has failed to place a number thereon up to date of compilation, but is located on the street named.

N. B.—The publishers of this Directory desire to thank the progressive business men and citizens who have so earnestly approved and endorsed their work, and trust the residents will appreciate the value of this additional evidence of progression on this part.
